FOR IMMEDIATE RELEASE

Educators Credit Union Saves its Members Over $30 Million!

RACINE, WI— Educators Credit Union's goal is to help members save money and be educated about their finances. Educators set up their Fast Lane Financing program for this reason. The original goal was to save members $20 million, which was then increased to $30 million when they reached that goal in a short time. In just 6 short months, Educators has already met the Fast Lane Financing savings goal of $30 million by tracking interest savings on all refinanced loan products from other financials!

A lot of people don't realize what their current loan interest rates are and are paying way too much. Educators started this program to help members become more knowledgeable about their loan rates and terms, by using their credit reports as a tool to determine what they are currently paying. When members sit down with a finance representative to look over their free credit reports, if Educators can save them money, they start the refinance process right away. **If they've been referred by another member, the member and the person saving money by refinancing get $25 each! (corrected sentence)**

Educators Credit Union is a not-for-profit financial institution serving over 110,000 members. Educators membership is open to anyone who has attended school in Southeastern Wisconsin in addition to education, healthcare and government related employees and their families.
